Alison Church
Arnold Arboretum
Harvard University
22 Divinity Avenue
Cambridge, MA 02138

Dear Alison,

We've finally found out what happened with the Harini specimens. Complete sets are at Arnold Arboretum, Field Museum, US, and Leiden; another specialist set was also reserved. There were also some uncommitted specimens. Marian Kadushin had to do some digging to find out all this, but she finally did find a file on it. She has recently sent you some labels. We just learned that the paper we have been making labels with is not acid-free, although the vendor said it was (one of the people at F had a special pen that shows whether paper is acid-free or not, and ours failed the test). I don't know if this will be a problem for you or not. We are now doing labels on that is acid-free according to the test pen.

Charlotte
